Key Features

A2iA CheckReader is the most comprehensive check recognition engine on the market.

It automatically reads natural, freeform cursive handwritten and machine-printed documents, including: business and personal checks, deposits slips, cash-in and cash-out documents. A2iA CheckReader has successfully been employed within: check processing, remittance processing, fraud detection, ATM, CRM and Check 21 Image Quality and Usability applications

A2iA CheckReader stands out as a leader due to its ability to read cursive handwritten words and machine print text as well as its focus on entire check recognition.

On check images, A2iA CheckReader can accurately read and locate:

- Courtesy and Legal Amounts (CAR+LAR)
Address of the Payer
Date
Payee Name
MICR Codeline
Presence of the Signature

Other Key A2iA CheckReader Features:

- Black List Payee Name Detection
CAR / LAR Mismatch Detection
Check Image Quality
Image Usability Analysis
Image Replacement Document Recognition
Money Order Detection and Recognition
Payment Type Classification
